STEINER BOOKS, United States, 1972. Paperback. Book Condition: New. 190 x 136 mm. Language: English . Brand New Book ***** Print on Demand *****.Please see An Outline of Esoteric Science for newest translation in print.This masterwork of esotericism places humankind at the very heart of the vast, invisible processes of cosmic evolution. When we use the term natural science, don t we mean that we are dealing with human knowledge of nature? Steiner worked and reworked his Rosicrucian cosmology to make it increasingly precise and accurate. An Outline of Esoteric Science is as vital and relevant now as it was when first published in 1910 and remains the most comprehensive and effective presentation of a spiritual alternative to contemporary, materialistic cosmologies and a strict Darwinian view of human nature and evolution.In this foundational work of spiritual science, we see how the creation and evolution of humanity is embedded at the heart of the vast, invisible web of interacting cosmic beings, through whom the alchemical processes of cosmic evolution continue to evolve. Included are descriptions of the physical-spiritual makeup of the human being; the relationships of the different bodies of the human being to sleep and death; and a detailed, practical guide to methods and exercises, including the Rose Cross Meditation, through which we can attain knowledge of the spiritual worlds. The most remarkable and revolutionary aspect of this work is the central function that Steiner attributes to the Christ and his involvement in human and earthly evolution through the Mystery of Golgotha.This volume is a translation of Geheimwissenschaft im Umriss (vol. 13 in the Bibliographic Survey, 1961). It was translated by Maud and Henry B. Monges and revised for this 1972 edition by Lisa D. Monges.
