This book is going to tell you all about how you can get the best of your land through knowing more about the types of soils, and soil preparation. When you learn more about the types of soils, especially in your area, you can go out, and look at those soils and classify them accordingly. After that, you are going to know all about their plus and minus points and how best you can enrich the soil, naturally, and get the best out of this land, given to us by nature, by right of inheritance. The soil is the storage house of mineral nutrients and water used by higher plants as well as the home of their roots. Therefore, it is necessary for you to know all about the physical and chemical composition of the soil with regards to crop production. The chemical composition can be changed by adding fertilizers and other materials, and to some extent by tillage, proper drainage, and other methods which are going to favor soil aeration. The physical condition can be changed by drainage, by tillage, by plowing, by incorporating rich organic matter, and...
