University of Texas Press, United States, 2014. Hardback. Book Condition: New. 236 x 165 mm. Language: English . Brand New Book. In the twenty-first century, we are continually confronted with the existential side of technology-the relationships between identity and the mechanizations that have become extensions of the self. Focusing on one of humanity s most ubiquitous machines, Automotive Prosthetic: Technological Mediation and the Car in Conceptual Art combines critical theory and new media theory to form the first philosophical analysis of the car within works of conceptual art. These works are broadly defined to encompass a wide range of creative expressions, particularly in car-based conceptual art by both older, established artists and younger, emerging artists, including Ed Ruscha, Martha Rosler, Richard Prince, Sylvie Fleury, Yael Bartana, Jeremy Deller, and Jonathan Schipper. At its core, the book offers an alternative formation of conceptual art understood according to technology, the body moving through space, and what art historian, curator, and artist Jack Burnham calls relations. This thought-provoking study illuminates the ways in which the automobile becomes a naturalized extension of the human body, incarnating new forms of car art and spurring a technological reframing of conceptual art. Steeped in a sophisticated take on the image and semiotics of the car, the chapters probe the politics of materialism as well as high/low debates about taste, culture, and art. The result is a highly innovative approach to contemporary intersections of art and technology.
