Excerpt: . fine sandstone, some of iron, others of bnnngmg out th= pot. tin or copper; the edges of some are square, or round, or sharp. They are u: ed with sand and water, or emery and water, stone wheels with water only. In a soluble form silicic acid is found in springs, and thus enters into the composition of most plants and grasses, while the shells and scales of infusoria consist of silica. As silicate of alumina, --i.e., clay, --it plays a very important role in our porcelain and pottery works. BORON is found in volcanic districts, in lakes as boracic acid, in combination with oxygen. It is a brownish-green, insoluble powder, in a free state, but as boracic acid it is white. It is used to colour fireworks with the beautiful green tints we see. Soda and boracic acid combine to make borax (or...
