ESSENTIALS OF PHARMACOLOGY FOR NURSES (3RD REVISED EDITION)

Open University Press. Paperback. Book Condition: new. BRAND NEW, Essentials of Pharmacology for Nurses (3rd Revised edition), Paul Barber, Deborah Robertson, This ideal starter text for student nurses makes pharmacology less intimidating by focusing on the knowledge needed at pre-registration level in order to practice as a newly qualified nurse. Noted for its clear layout and jargon-free language, this updated edition introduces pharmacology in a friendly, informative way. The book does not assume previous knowledge of pharmacology, or a level of confidence with maths and drugs calculations. This new edition has been carefully expanded to include a new chapter introducing drug calculations and measurements as well as more detail on drugs used in chronic conditions, as well as more on pharmacology for the older patient and for other specific groups such as children, pregnant women or those with minor illness. More case scenarios have been added to encourage nurses to apply knowledge to a range of different people with a range of needs. The book contains: 90 calculations and 100 multiple choice questions to help perfect your skills and assess learning Clinical tip boxes linking pharmacology to the role of the nurse 35 patient scenarios across a range of clinical settings References to key clinical tests and the latest NICE guidelines The book emphasises application of pharmacological principles to all areas of practice including drug action, interaction and side effects, and is useful to all students of pharmacology whether as part of a 3 year course, post-qualifying course, top-up course or standalone module.
