CONDENSED CATALOGUES OF MECHANICAL EQUIPMENT

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 72 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: . . . to 5 lbs. Pressure, THE WYOMING WEIGHT OPERATED TRAP The float is only instrumental in releasing the valve weight, which in dropping, lifts the discharge valve. No dependence whatever is placed upon the buoyancy or weight of the float to lift the discharge valve. The valve weight consists of a levered cast-iron ball, the weight of which governs the capacity or size of hole through the discharge valve seat. The valve mechanism is of the quick opening and closing type, dispensing entirely with wiredrawing through the discharge valve. The discharge valve is covered by at least three inches of water at all times, making a water-sealed valve, thus preventing any possible escape of steam. All parts are attached to the cover which can be removed within a few minutes. Valves and Water Gages PENBERTHY INJECTOR CO. REGRINDING GLOBE VALVES The ever increasing demand to-day by Power Plant owners and steam users in general is for valves that will give absolutely reliable service and dependability under high pressures and severe conditions, and that are free from unnecessary renewal of discs and repair parts. To meet this demand the Penberthy Regrinding Valve has been designed. It is the result of many years practical experience in the manufacture of high grade brass goods, and embodies the best mechanical ideas ever employed in mechanical construction. It is the heaviest regrinding valve manufactured, and the distribution of metal is such that parts subjected to the greatest strain and wear have proportionately...
